# Steps to follow to connect to Atlas

## Step 1:

We go to the official MongoDB page, to later go to our previously created project.

Once inside the project we can see our database.

## Step 2:

We click on the “connect” to be able to download the files locally on our PC.

Get your pre-formatted connection string by selecting your tool below.

 **Connect with the MongoDB Shell**  
Interact with your cluster using MongoDB's interactive Javascript interface

 **Connect your application**  
Connect your application to your cluster using MongoDB's native drivers

 **Connect using MongoDB Compass**  
Explore, modify, and visualize your data with MongoDB's GUI

 **Connect using VS Code**  
Connect to a MongoDB host in Visual Studio Code

Connect

I do not have the MongoDB Shell installed

I have the MongoDB Shell installed

1 Select your operating system and download the mongosh

Windows

Download mongosh (6.1.0)

 or 

Copy download URL

2 Add <your mongosh's download directory>/bin to your \$PATH variable. [How to](#)

3 Run your connection string in your command line

Use this connection string in your application:

```
mongosh "mongodb+srv://sandbox.g4q4dnd.mongodb.net/myFirstDatabase" --apiVersion 1 --username m001-student
```

Replace **myFirstDatabase** with the name of the database that connections will use by default. You will be prompted for the password for the Database User, **m001-student**. When entering your password, make sure all special characters are [URL encoded](#).

Later we choose the option *"I don't have MongoDB shell installed"* and we choose the operating system that we are using, in my case windows and proceed to unzip the file.

hoy (1)			
 mongosh-1.6.0-win32-x64	10/10/2022 11:01	Carpeta comprimi...	40.051 KB

### Step 3

As an optional step, once the file is unzipped, we go to the cmd and execute the command `"mongosh --version or mongo --version"` inside the bin folder that we unzipped in the previous step to verify the version of our Mongo DB.

```

C:\Users\Edgar>cd Downloads

C:\Users\Edgar\Downloads>cd mongosh-1.6.0-win32-x64

C:\Users\Edgar\Downloads\mongosh-1.6.0-win32-x64>cd mongosh-1.6.0-win32-x64

C:\Users\Edgar\Downloads\mongosh-1.6.0-win32-x64\mongosh-1.6.0-win32-x64>cd bin

C:\Users\Edgar\Downloads\mongosh-1.6.0-win32-x64\mongosh-1.6.0-win32-x64\bin>mongosh --version or mongo --version
1.6.0

C:\Users\Edgar\Downloads\mongosh-1.6.0-win32-x64\mongosh-1.6.0-win32-x64\bin>
```

We go back to the Connect section of our database, this time in the *"I have mongoDB installed"* section

#### Connect to Sandbox

Connect

I do not have the MongoDB Shell installed

I have the MongoDB Shell installed

1 Select your mongo shell version

4.4

(To check your shell version, run `mongosh --version` or `mongo --version`)

2 Run your connection string in your command line

Use this connection string in your application:

mongo "mongodb+srv://sandbox.g4q4dnd.mongodb.net/myFirstDatabase" --username m001-student

Replace `myFirstDatabase` with the name of the database that connections will use by default. You will be prompted for the password for the Database User, `m001-student`. When entering your password, make sure all special characters are [URL encoded](#).

We choose this option

**1 Select your mongo shell version**

(To check your shell version, run `mongosh --version` or `mongo --version`)

. We copy the following command.

**2 Run your connection string in your command line**

Use this connection string in your application:

```
mongosh "mongodb+srv://sandbox.g4q4dnd.mongodb.net/myFirstDatabase" --apiVersion
1 --username m001-student
```

When pasting it in the cmd we must execute it and put our password will connect us directly to atlas locally.

```
C:\Users\Edgar\Downloads\mongosh-1.6.0-win32-x64\mongosh-1.6.0-win32-x64\bin>mongosh "mongodb+srv://sandbox.g4q4dnd.mongodb.net/myFirstDatabase" --apiVersion 1 --username m001-student
Enter password: *****
Current Mongosh Log ID: 6343e3f0142b2f00c9570f40
Connecting to:      mongodb+srv://<credentials>@sandbox.g4q4dnd.mongodb.net/myFirstDatabase?appName=mongosh+1.6.0
Using MongoDB:      5.0.13 (API Version 1)
Using Mongosh:      1.6.0

For mongosh info see: https://docs.mongodb.com/mongosh-shell/

To help improve our products, anonymous usage data is collected and sent to MongoDB periodically (https://www.mongodb.com/legal/privacy-policy).
You can opt-out by running the disableTelemetry() command.
